Phone: +1(256)394-0387

Email: parminder@techjobmails.com

Location: Keyes, CA,USA

SUMMARY

- 2+ years of IT experience in the field of Business/Data analysis, ETL Development and Data Modeling
- Proficient in all facets of Business Analysis, Data Analysis, Business Process Modeling, and Use Case development
- Built Python Modules to deliver specific formats of data and developed Python script to for processing large data sets and also to extract data from different files.
- Strong experience in Business and Data Analysis, Data Profiling, Data Migration, Data Integration & Metadata Management Services
- Deep understanding of Statistical modeling, Multivariate Analysis, model testing, problem analysis, model comparison, and validation.
- Experience in creating Power BI Dashboards (Power View, Power Query, Power Pivot, Power Maps).
- Experience working on Tableau (Desktop, Server, Reader), creating various Reports and Dashboards using different functionalities.

SKILLS

Languages: Python, SQL, R

Data Visualization Tools: Tableau, Power BI

Databases: MySQL, PostgreSQL, MongoDB

ETL Tool: SSIS, Talend

Cloud Platform: AWS (S3, Redshift), Snowflake

Libraries/Frameworks: NumPy, Pandas, Matplotlib, Seaborn, SciPy, ggplot2

EXPERIENCE

Data Analyst **July 2024 – Present**

Universal Health Services **USA**

- Evaluated and enhanced the current data model to meet healthcare industry standards and requirements.
- Collaborated with cross-functional teams using Agile methodology, resulting in an increase in project efficiency and on-time delivery of data analytics solutions.
- Incorporated AWS services like S3 bucket & Redshift to manage and analyze healthcare data securely, resulting in 30% improvement in data processing speed.
- Designed interactive dashboards using Tableau and Power BI, providing actionable insights to healthcare teams, leading to a 20% increase in patient satisfaction scores.
- Developed and maintained ETL pipelines using Python and SQL to streamline EDI download and financial data analysis processes, supporting production and material planning.
- Conducted graphical analysis of healthcare datasets using Python to obtain insights into patient demographics and treatment outcomes.
- Designed and maintained complex SQL queries for data extraction and exploratory data analysis to identify trends such as patient admission rates and retention.

Data Analyst **January 2020 – November 2021**

Bytes Soft Solution **India**

- Applied DAX functions to create interactive and insightful dashboards in Power BI, which enhanced data visualization capabilities and improved stakeholder engagement.
- Developed and maintained interactive Power BI dashboards providing real-time insights into KPIs, leading to an increase in decision-making speed.
- Optimized data pipelines to ensure efficient data flow and processing, resulting in a 15% reduction in processing time.
- Improved data models and cleansed data using SQL ensuring high-quality data for projects.
- Automated reporting processes using Python, decreasing manual reporting time by 30% and increasing reporting accuracy.
- Utilized SSIS and Talend Open Studio for ETL tasks, delivering technical solutions to business stakeholders.
- Executed SQL queries to access and analyze data from the relational database for data modeling and reporting.

EDUCATION

Bachelors of Science: - University of North Alabama, AL, May 2024
