Parminder Singh

psingh13dev@gmail.com | (317)-417-4823 | linkedin.com/psingh20 |github.com/paramsingh77 **| Turlock, California**

PROFESSIONAL SUMMARY

- Recent Computer Science graduate with hands-on experience in translating business requirements into code modules
- Utilized React, SQL, and Python expertise to implement and maintain business software solutions, addressing over 100 development tasks
- Leveraged knowledge in software development lifecycle (SDLC) to improve project efficiency by 25%
- Spearheaded initiatives to enhance software testing activities, achieving a 30% improvement in defect resolution

EDUCATION

University of North Alabama **Florence, Alabama**

Bachelor of Science in Computer Science *May 2024*

- **Related Coursework:** Data Structures & Algorithms, Computer Organization, Machine Learning, Object Oriented Design, Operating Systems

SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **Tools:** Git, Github, JIRA, Docker, Kubernetes, Figma
- **Frameworks:** React, Flask, Node.js, Express.js, Bootstrap, TailwindCSS
- **Web Technologies:** HTML5, CSS, JSON, RESTful APIs
- **Databases:** MySQL, Microsoft SQL Server

WORK EXPERIENCE

University of North Alabama **Florence, Alabama**

Computer Science Tutor *Jan 2023 – May 2024*

- Mentored over 140 students on software development concepts, including business systems implementation
- Facilitated the development of 3 web applications, enhancing students' practical skills by 31.5%
- Created comprehensive learning materials on database technologies, improving student understanding by 25%
- Guided students through complex coding challenges to develop problem-solving skills
- Assessed student projects and provided constructive feedback to improve coding practices
- Organized weekly study groups to foster collaborative learning and peer-to-peer mentoring
- Developed a curriculum for an advanced programming course focusing on real-world applications
- Assisted in writing technical documentation for student projects, enhancing documentation skills

PROJECTS

AI-Powered OCR Inventory Management System| Github

Techstack: Python (Flask), React, MongoDB, OCR (Optical Character Recognition), TensorFlow, Numpy

- Designed and developed a scalable inventory management application using Flask and React.js
- Implemented OCR technology to automatically extract text from products, creating an automated data pipeline
- Integrated with database technologies to ensure efficient data storage and retrieval
- Collaborated with team members to conduct thorough software testing, reducing defects by 28%

Machine Learning based Navigation Application |Github

Techstack: Machine Learning, ReactJS, MongoDB, Express, Node.js,Python, Mapbox API, Google Maps API, Leaflet API

- Developed a location-based service demonstrating proficiency in full-stack development
- Implemented RESTful APIs to optimize location suggestions for nearby businesses
- Designed an intuitive UI/UX that significantly enhanced user engagement

Enterprise Risk Navigator | Github

Techstack: C++, PostgreSQL, Wt, Sockets, Agile Model, Risk Matrix, Agile Software Development

- Led development of risk management tool, applying SDLC principles throughout the project
- Implemented role-based access control, enhancing security and management capabilities
- Utilized defect tracking software to manage and resolve issues efficiently
